OUR SERVICES

1. Sand Blasting & Painting
2. Abrasive Blasting & Protective Coating
3. Fiberglass Lining
4. Pipe Wrapping
5. Fireproofing
6. Waterproofing
7. Concrete Repair
8. Civil Construction & Maintenance
9. Steel Fabrication & Erection
10. Scaffolding Erection & Dismantle
11. Manpower, Equipment & Materials Supply

WHY?

Choose Us

Reliable Work Delivery

Skilled Professional Team

Cost-Effective Options

High Quality Standards

Sand Blasting & Painting

Our goal is to ensure long-lasting protection against corrosion, rust, chemicals, and environmental damage. Using advanced equipment and industry-standard techniques, We provides reliable surface preparation and protective solutions for various industrial sectors.

ABRASIVE BLASTING &

PROTECTIVE COATING

Abrasive blasting is a surface preparation technique that uses compressed air or water to propel abrasive media—such as steel grit, aluminum oxide, or garnet—at high velocity to clean, remove contaminants, and create a profiled surface for optimal adhesion of protective coatings.

Fiberglass Lining

Fiberglass Lining, GRP Linings, is the use of saturating glass fiber mats in unsaturated polyester resin to form a composite coating. This material is versatile making them ideal for variety of surfaces, and, since the material is also durable, it can be used in coating metals, concrete, and glass fiber (GRP) surfaces.

PIPE WRAPPING

Steam room maintenance focuses on managing high humidity to prevent mold and ensuring the mechanical steam generator remains clear of mineral buildup

Fireproofing

Pipe Wrap system is a durable, easy-to-use solution that's ideal for protecting pipes against corrosion, abrasion and impact in piping applications for petroleum refineries, chemical handling and mining.

WATER PROOFING

Creates a barrier to prevent water from passing through surfaces that have frequent contact with water, such as foundations, roofs, and walls. So waterproofing materials are one of the most important elements of a building project, increasing the durability of many different surfaces in construction.

Concrete Repair

Concrete repair restores damaged concrete surfaces, structures, or structural integrity using materials like epoxy, mortar, and polymers.

CIVIL CONSTRUCTION MAINTENANCE

Civil construction maintenance involves the inspection, repair, and upkeep of infrastructure like buildings, roads, and bridges to ensure safety, functionality, and longevity. Key activities include preventative maintenance, structural repairs, painting, and utility servicing (plumbing/electrical). Regular maintenance prevents deterioration, ensuring assets remain safe and operational

STEEL FABRICATION & ERECTION

Steel fabrication and erection involve cutting, bending, welding, and assembling steel components in a workshop, followed by transporting and lifting them into place on-site to create structural frameworks. Key steps include detailed design, precise fabrication, rigorous quality checks, safe lifting using cranes, and final securing through bolting or welding

SCAFFOLDING ERECTION & DISMANTLE

Scaffolding erection and dismantling must be performed by certified personnel under expert supervision to ensure structural integrity and safety. Key procedures include preparing stable foundations, using appropriate bracing/ties, installing guardrails, and following a reverse order for dismantling, starting from the top. Key hazards to manage include falls, collapses, and overloads

MANPOWER, EQUIPMENT & MATERIALS SUPPLY

Manpower, equipment, and materials supply services provide comprehensive workforce and logistical support for industrial, construction, and oil & gas projects.

These firms offer skilled/unskilled labor, certified machinery (cranes, excavators), and essential construction materials, often on short or long-term rental, enhancing project productivity, safety, and operational efficiency.

Provision of skilled and unskilled workers, including engineers, technicians, welders, plumbers, masons, electricians, and general labor for construction, technical, and industrial needs.
